Thiago de Matos

FULL-STACK DEVELOPER

SUMMARY

Hello there! I'm Thiago de Matos, your go-to full-stack engineer with a little bit over 1 years of experience. I am on a mission to turn everyday problems into stunning solutions through the magic of code. My specialization revolves around the dynamic realm of JavaScript, where I thrive on bringing ideas to life through code. Picture me, fueled by a latte, immersed in the captivating world of programming, transforming concepts into seamless digital experiences.

PROJECT + EXPERIENCE

devbythiago.com (Portfolio Website | Code**)** HTML + Sass + Netlify
- Utilized HTML for main content and Sass to modularize and simplify style files through the use of partials and variables
- Compiled Sass file through the use of NPM
- Created Responsive Design through the use of media queries
- Utilized "CSS animation" to add complex animation to website
- Hosted website site through tying GitHub account to Netlify

Listdo (PM / To-do App | Code**)** HTML + CSS + JS + Webpack
- Modularized project through the utilizing webpack
- Used JS Classes to create projects and to-do's which allowed me to control their functionality
- Led project with functional programming methodology and minimize variables on a global scope
- Manipulated DOM in variance instances like toggling dark mode, or displaying to-do's object property on page.
- Utilized array's for data storage and array method's for manipulating accessing the data structure

ResGen (Resume Generator | Code**)** React + GitHub Pages
- Used React Components to compartmentalize the project so that each part can have a single responsibility.
- Utilized controlled components by lifting up the state hook to closest ancestor component
- Passed props from children to parent components to be able to display text on screen
- Separated CSS files so that each component can be styled by a corresponding CSS file

WORK EXPERIENCE

TTA (The Training Associates):
Current Position: Talent Recruitment Manager (L&D + Technical Recruiter)
- **QA team:** reduced 40% of bugs prior Internal Software Launch.
Positions held: Recruiting Coordinator (Jun 2022 – current)

EDUCATION & CERTIFICATION

HARVARD UNIVERSITY CS50X (*CURRENTLY WORKING*)
THE ODIN PROJECT: FULL-STACK JS
UDEMY: COMPLETE 2024 WEB-DEVELOPER BOOCAMP
CODING WITH MOSH: ULTIMATE-JAVASCRIPT SERIES
UDEMY: MASTERING DATA- STRUCTURES & ALGORITHMS
Mongo DB University: 6
Six Sigma White Belt
Tri County RVTHS

Technology & Skills

LANGUAGES: HTML5, CSS3, SASS, JAVASCRIPT (ES6), NODE, MONGODB, JSX, MARK-DOWN
Framework: React, jQuery, Bootstrap, Tailwind, Express
Other Tech: Webpack, Vite, GitHub, WordPress, VSCode (Visual Studio), codesandbox.com, REPLIT, JSON, Netlify, Babel, Git, Canva, Postman, Git Kraken, Notion, Jira,
